# **Section 4: FIRST AID MEASURES**

Description of First Aid measures:

**General Advice:** Have the product container, label or Safety Data Sheet with you when

calling the emergency number, the National Poisons Centre, Doctor or

going for treatment.

For advice contact the National Poisons Centre on 0800 POISON

(0800 764 766) or a doctor immediately.

**If inhaled:** Move the victim to fresh air.

If breathing is irregular or stopped, administer artificial respiration.

Keep patient warm and at rest.

Call a Doctor or the National Poisons Centre immediately.

In case of skin contact: Take off all contaminated clothing immediately.

Wash off immediately with plenty of water. If skin irritation persists, call a doctor. Wash contaminated clothing before re-use.

In case of eye contact: Rinse immediately with plenty of water, also under the eyelids, for at

least 15 minutes.

Remove contact lenses (if present). Immediate medical attention is required.

If swallowed: If swallowed seek medical advice immediately and show the

container or label.

DO NOT induce vomiting.

Important symptoms and effects, both acute and delayed:

Symptoms: Non specific.

No symptoms known or expected.

Indication of any immediate medical attention and special treatment needed:

Treatment: There is no specific antidote available.

Treat symptomatically.

#### **Section 5: FIRE-FIGHTING MEASURES**

Extinguishing media:

Suitable extinguishing media: Small fires:

Use water spray, alcohol-resistant foam, dry chemical or carbon

dioxide. Large Fires:

Alcohol resistant foam or water spray.

**Unsuitable extinguishing media:** Do not use a solid water stream as it may scatter and spread fire.

Special hazards arising from the substance or mixture:

Specific hazards during fire-

fighting:

As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of

combustion (see section 10)

Exposure to decomposition products may be a hazard to health.

Advice for firefighters:

Special protective equipment for

firefighters:

Wear full protective clothing and self-contained breathing apparatus.

**Further information:** Do not allow run-off from fire fighting to enter drains or water courses.

Cool closed containers exposed to fire with water spray.

## **Section 6: ACCIDENTIAL RELEASE MEASURES**

Personal precautions, protective equipment and emergency procedures

Refer to protective measures listed in Sections 7 and 8.

Environmental Precautions:

Prevent further leakage or spillage if safe to do so. Do not flush into surface water or sanitary sewer system.

If the product contaminates rivers and lakes or drains inform respective

authorities.

Methods and material for containment and cleaning up:

Contain spillage, and then collect with non-combustible absorbent material, (eg, sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local regulations (see section 13). If the product contaminates rivers and lakes or drains inform respective

authorities.

Reference to other sections: Refer to disposal considerations listed in Section 13.

Refer to protective measures listed in sections 7 and 8.

# **Section 7: HANDLING AND STORAGE**

Exposure controls

Engineering measures: Containment and/or segregation is the most reliable technical

protection measure if exposure cannot be eliminated.

The extent of these protection measures depends on the actual risks in

use.

Maintain air concentrations below occupational exposure standards. Where necessary, seek additional occupational hygiene advice.

Personal Protective Protection:

Eye protection:

No special protective equipment required.

Hand protection: Remarks:

No special protective equipment required.

**Skin and body protection:** No special protective equipment required.

Select skin and body protection in relation based on the physical job

requirements.

**Respiratory protection:** No personal respiratory protective equipment normally required.

When workers are facing concentrations above the exposure limit they

must use appropriate certified respirators.

**Protective measures:** The use of technical measures should always have priority over the

use of personal protective equipment.

When selecting personal protective equipment, seek appropriate

professional advice.
