# Section 4: FIRST AID MEASURES

Description of First Aid measures:

General Advice: For advice contact the National Poisons Centre on 0800 POISON

 $(0800\ 764\ 766)$  or a doctor immediately. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to

mouth. Obtain medical attention.

**If inhaled:** Move the victim to fresh air.

If breathing is irregular or stopped, administer artificial respiration.

Keep patient warm and at rest.

Call a Doctor or the National Poisons Centre immediately.

**In case of skin contact:** Take off all contaminated clothing immediately.

Wash off immediately with plenty of water. If skin irritation persists, call a doctor. Wash contaminated clothing before re-use.

In case of eye contact: Rinse immediately with plenty of water, also under the eyelids, for at leas

15 minutes.

Remove contact lenses (if present). Immediate medical attention is required.

If swallowed: If swallowed seek medical advice immediately and show the container or

label.

DO NOT induce vomiting.

Important symptoms and effects, both acute and delayed:

Symptoms: No information available

Indication of any immediate medical attention and special treatment needed:

Treatment: There is no specific antidote available.

Treat symptomatically.

# **Section 5: FIRE-FIGHTING MEASURES**

Extinguishing media:

Suitable extinguishing media: Small fires:

Use water spray, alcohol-resistant foam, dry chemical or carbon

dioxide. Large Fires:

Alcohol resistant foam or water spray.

**Unsuitable extinguishing media:** Do not use a solid water stream as it may scatter and spread fire.

Special hazards arising from the substance or mixture:

Specific hazards during fire-

fighting:

Fire will spread by smouldering or slow decomposition.

As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of

combustion (see section 10)

Exposure to decomposition products may be a hazard to health.

Advice for firefighters:

**Further information:** 

Special protective equipment for

firefighters:

Wear full protective clothing and self-contained breathing apparatus.

Do not allow run-off from fire fighting to enter drains or water courses.

Cool closed containers exposed to fire with water spray.

#### **Section 6: ACCIDENTIAL RELEASE MEASURES**

Personal precautions, protective equipment and emergency procedures

Refer to protective measures listed in Sections 7 and 8.

Avoid dust formation.

**Environmental Precautions:** 

Do not flush into surface water or sanitary sewer system.

If the product contaminates rivers and lakes or drains inform respective

authorities.

Methods and material for containment and cleaning up:

Contain spillage, pick up with an electrically protected vacuum cleaner

or by wet-brushing and transfer to a container for disposal according to

local regulations (see section 13).

Do not create a powder cloud by using a brush or compressed air.

Clean contaminated surface thoroughly. Clean with detergents. Avoid solvents.

If the product contaminates rivers and lakes or drains inform respective

authorities.

Reference to other sections: Refer to disposal considerations listed in Section 13.

Refer to protective measures listed in sections 7 and 8.

## **Section 7: HANDLING AND STORAGE**

Precautions for Safe handling:

Advice on safe handling:

This material is capable of forming flammable dust clouds in air, which,

if ignited, can produce a dust cloud explosion.

Flames, hot surfaces, mechanical sparks and electrostatic discharges

can serve as ignition sources for this material.

Electrical equipment should be compatible with the flammability characteristics of this material. The flammability characteristics will be made worse if the material contains traces of flammable solvents or is

handled in the presence of flammable solvents.

Avoid contact with skin and eyes. When using do not eat, drink or smoke. For personal protection see section 8.

**Dust Explosion Class:** May form flammable dust-air mixture.

Conditions for safe storage, including any incompatibilities:

Requirements for storage areas

and containers:

Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of reach of children. Keep away from food, drink and animal

feeding stuffs.

Further information on storage

stability:

Physically and chemically stable for at least 2 years when stored in the

original unopened sales container at ambient temperatures.

Specific end use(s)
Specific use(s)

For proper and safe use of this product, please refer to the approval

conditions laid down on the product label.

## Section 8: EXPOSURE CONTROL / PERSONAL PROTECTION

Control	Parameters 4 6 1
---------	------------------

**Occupational Exposure Limits:** 

occupational Exposure Elimites				
Components	CAS No	Exposure limit	Type of exposure limit	Source
Cyprodinil	121552-61-2	5 mg/m <sup>3</sup>	TWA	Syngenta
Silica	61790-53-2	10 mg/m <sup>3</sup>	TWA (inhalable dust)	WES

Exposure controls

Engineering measures:

Containment and/or segregation is the most reliable technical

protection measure if exposure cannot be eliminated.

The extent of these protection measures depends on the actual risks in

use.

If airborne dust is generated, use local exhaust ventilation controls. Assess exposure and use any additional measures to keep airborne

levels below any relevant exposure limit.

Where necessary, seek additional occupational hygiene advice.

Personal Protective Protection:

Eye protection:

No special protective equipment required.

Hand protection:

Remarks:

No special protective equipment required.

**Skin and body protection:** No special protective equipment required.

Select skin and body protection based on the physical job

requirements.

**Respiratory protection:** 

No personal respiratory protective equipment normally required.

When workers are facing concentrations above the exposure limit they

must use appropriate certified respirators.

Protective measures:

The use technical measures should always have priority over the use of personal protective equipment.

When selecting personal protective equipment, seek appropriate professional advice.
