

Alga 600™ Pure Seaweed Extract

Alga 600 is a balanced consistent blend of cold water Northern Hemisphere and sustainably farmed brown seaweeds grown and harvested in pollution free waters.

Alga 600 is created using low temperate, fast drying cell burst technology.

No harsh chemicals, no additives, heavy metals, nitrates or preservatives!

Alga 600 is a highly soluble crystal formulation containing three species of seaweed:

- Sargassum
- Laminaria
- Ascophyllum Nodosum

Sargassum is rich in alginic acid and cytokinin (natural plant growth regulators). Grown in sustainable seaweed farms. The seaweed grown in these farms is shipped all over the world for a wide range of horticultural uses.

Laminaria is abundant in laminaria polysaccharide (aids the plants natural defense mechanism). Sustainably farmed in the same area as Sargassum.

Ascophyllum Nodosum is a traditional and trusted raw seaweed material with a high nutrient content sourced from the Northern Hemisphere.

Leili blends these three seaweeds together to ensure consistent NPK and natural Amino Acids/PGR content in Alga 600.

Each batch is tested to ensure both nutrient and PGR/ Amino acid content.

Used and trusted by growers in over 73 countries worldwide.

1kg foil easy to use rip and tip hectare pack.

High natural content of PGR up to 600ppm.

Alga 600 NPK and Amino Acid Content

(test results sourced from independent laboratory source)

Organic Matter	45-55% w/w
Total Nitrogen	0.5 - 0.8% w/w
Potassium	17 - 19 % w/w
Mg	0.04% w/w
Ca	0.6% - 1.8% w/w
Fe	0.15% - 0.3% w/w
Cu	7 ppm
S	1% - 1.5% w/w
I	350ppm – 650ppm

Amino Acids

Alanine	210
Arginine	10
Aspartic Acid	300
Cystine	200
Glutamic Acid	470
