CHARACTERISTICS

BLOK 5 is a specialty to increase the resistance and tolerance of plant against environmental stress. The product contains different plant extracts, rich in polysaccharides, amino acids and phenylpropanoids which stimulate a number of different pathways in secondary metabolism reinforcing tissues and priming the plant to fast response to stress. BLOK 5 optimizes plant nutritional status by delivering a complete nutrient supply for primary metabolism and photosynthesis.

- Promotes the plant's endogenous defense mechanisms
- Improves productivity and quality
