Physical properties:	
Colour :	grey-white
Bulk density (g/l):	900-1150
pH (1:10 in water) =	0,3 - 1,8
Physical appearance :	Crystalline solid fertilizer, homogenously treated for improved transport and storage properties.

Recommendation for application:	
This fertilizer contains all stated plant nutrients for a customized fertilization of agricultural and horticultural crops. Its excellent solubility prevents clogging of drip emitters or nozzles. As, however, certain types of water may lead to precipitation even without the addition of fertilizer, special care is required where such waters are used.	

Miscibility:	
This fertilizer is miscible with virtually all the common plant protection agents; it is not miscible with strongly alkaline products or with mineral oils. A simple compatibility test with the intended mixing partners is recommended before practical use.	

Cu, Fe, Mn and Zn chelated by EDTA.
