Contamination

The product is to be free of foreign matter and free flowing. Imported complying with the Import Health Standard (IHS) for Bulk Inorganic Fertiliser (INORGFERT.ALL) as issued under section 22 of the Biosecurity Act 1993 (the Act). The Ravensdown Fertiliser Imports System operates under cooperative partnership agreement between MPI New Zealand (Regulator) and Ravensdown (Importer). All supply chains are annually audited by an independent Third Party, Hunter Quality Solutions 'HQS' (Systems Management). All shipments are overseen by independent third party inspectors ensuring adherence to the agreed partnership agreement between MPI New Zealand, Ravensdown. All imports comply with requirements with respect to foreign matter of plant or animal origin.

Issue Date: August 2018
