

TECHNICAL SHEET

Living Earth Turf Mix

Mini granulated fertiliser with readily available nutrients, then 10-12 weeks release. 90% of prills in the 1-3mm range.

Living Earth Turf Mix

24 N + 2.8 P + 9 K

+ 1.0 Mg
(elemental)

+ trace nutrients

Nutrient analysis

Nitrogen (N)	24%
NH_4^+ Nitrogen	5.4%
NO_3^- Nitrogen	1.8%
Methylene Urea	17.2%
Phosphorus (P)	2.8%
as water soluble	
Potassium (K)	9%
as Potassium Sulphate	
Sulphur (S)	6%
Magnesium (Mg)	1.0%
Iron (Fe)	0.20%
Zinc (Zn)	0.012%
Boron (B)	0.012%
Manganese (Mn)	0.012%

20 kg bags

Living Earth Turf Mix is a mini granulated fertiliser with readily available nutrients as well as nutrients available over a 10-12 weeks release. It is suitable for professional turf, including parks, reserves, sports fields, golf tees and surrounds, and preparation of growing media for seeding turf.

Main benefits

- Immediately available nutrients to provide quick growth, even during cool conditions.
- Sustained feeding for 10-12 weeks to help ensure even growth and sustained greening of fine turf.
- High levels of Nitrogen for a quick "green-up".
- Balanced Potassium & Magnesium for quality turf.
- Inclusion of Sulphur and micronutrients.

Easy application

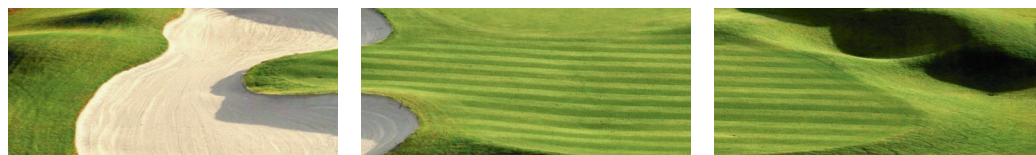

90% of the mini granules are within a 1-3 mm range so they can be easily applied by spreader or by hand. The nutrients will be very evenly spread as each granule contains all nutrients.

Apply to a dry surface, then water in to promote immediate effect.

Recommended application rates

Area	kg / 100 m ²	g / m ²	applications / year
Turf			
Parks & Reserves	2-3	20-30	1-2
Sportsfields	2-3.5	20-35	1-3
Golf course tees	2-3	20-30	1-2
Turf establishment	1.5-2	15-20	2-3

Preparation of growing mixes for turf: 0.2-0.5 kg / m³.
