### Section 4. First Aid Measures

Routes of Exposure:

If in Eyes	Immediately flush with large quantities of water for 15 minutes. Hold eyelids apart during irrigation to ensure thorough flushing of the entire area of the eye and lids. Obtain medical attention if irritation occurs.
If on Skin	Immediately flush with large quantities of water. Remove contaminated clothing under a safety shower. Continue rinsing. Obtain medical attention if irritation occurs.
If Swallowed	If victim is conscious, give 2 to 4 glasses of water and induce vomiting by touching finger to back of throat. Never give anything to the mouth of an unconscious person. If vomiting occurs, place victim face downwards, with the head turned to the side and lower than the hips to prevent vomit entering the lungs. Call a POISON CENTER or doctor/physician if needed.
If Inhaled	Remove person to fresh air. Remove contaminated clothing and loosen remaining clothing. Allow person to assume most comfortable position and keep warm. Keep at rest until fully recovered. Get medical advice if breathing becomes difficult.

#### Most important symptoms and effects, both acute and delayed

Symptoms:

<b>Ingestion:</b>	Not applicable.
<b>Inhalation:</b>	Not applicable.
<b>Skin:</b>	Causes skin irritation.
<b>Eyes:</b>	Causes serious eye irritation.

### Section 5. Fire Fighting Measures

<b>Hazard Type</b>	Non-Flammable
<b>Hazards from products</b>	Heating or flames causes release of oxides of sulfur. Sulfur dioxide is highly irritating to the eyes, respiratory tract and moist skin. Avoid raising dust which is irritating to the eyes and respiratory tract.
<b>Suitable Extinguishing media</b>	Use media suitable for combustibles involved in the fire.
<b>Precautions for firefighters and special protective clothing</b>	Firefighters should wear self-contained breathing apparatus (SCBA) and full fire-fighting turnout gear. Keep containers/storage vessels in fire area cooled with water spray.

**Section 6. Accidental Release Measures**

Wear protective equipment as detailed in Section 8. Isolate the release area and deny entry to unnecessary, unprotected and untrained personnel.

Do not allow to enter waterways.

Small release: Confine and absorb small releases with sand, earth or other inert absorbents. Shovel up contained material and place in drums for disposal as a chemical waste or recycle as a fertilizer as the original product was intended.

Large release: Stop release if safe to do so. Dike spill area with earth, sand or other inert absorbents to prevent runoff into surface waterways (potential aquatic toxicity), storm drains and sewers. Recover as much of the spilled product as possible with shovel and brooms taking care not to create dust. Use material as originally intended or dispose of as a chemical waste. Treat remaining material as a small release (above).

**Section 7. Handling and Storage****Precautions for Handling:**

- Read label before use.
- Wash hands thoroughly after handling.
- Avoid contact with eyes.
- Use only in a well-ventilated area.
- Wash thoroughly after handling.
- Avoid prolonged or repeated breathing of dust.
- Avoid prolonged or repeated contact with the skin.
- Wear protective clothing as detailed in Section 8.

**Precautions for Storage:**

- Store in well-ventilated areas.
- Do not store combustibles in the area of storage vessels.
- Keep away from any sources of heat or flame.
- Store totes and smaller containers out of direct sunlight at moderate temperatures.

**Section 8 Exposure Controls / Personal Protection****WORKPLACE EXPOSURE STANDARDS (provided for guidance only)**

Substance	TWA		STEL	
	ppm	mg/m <sup>3</sup>	ppm	mg/m <sup>3</sup>

No ingredients have exposure limits

Workplace Exposure Standard – Time Weighted Average (WES-TWA). The time-weighted average exposure standard designed to protect the worker from the effects of long-term exposure. Workplace Exposure Standard – Short-Term Exposure Limit (WESSTEL). The 15-minute average exposure standard. Applies to any 15- Minute period in the working day and is designed to protect the worker against adverse effects of irritation, chronic or irreversible tissue change, or narcosis that may increase the likelihood of accidents. The WES-STEL is not an alternative to the WES-TWA; both the short-term and time-weighted average exposures apply. Workplace Exposure Standards and Biological Exposure Indices NOV 2019 11TH EDITION.

**Engineering Controls**

Use adequate exhaust ventilation to prevent inhalation of product dust.  
Keep eye wash/safety shower in areas where product is commonly handled.

**Personal Protection Equipment**

<b>Eyes</b>	In case of dust formation: Tightly fitting safety goggles.
<b>Hands and Skin</b>	Neoprene rubber gloves and apron should be worn to prevent repeated or prolonged contact with dust. Wash contaminated clothing prior to reuse.
<b>Respiratory</b>	Respiratory protection is based on potential for exposure to product dust.
<b>Hygiene</b>	Common good industrial hygiene practices should be followed, such as washing thoroughly after handling and before eating or drinking.
