

SAFETY DATA SHEET

Section 1: IDENTIFICATION

Product Name:	PROCLAIM
Design Code:	A10324A
Recommended Use:	Insecticide
Company Details:	Syngenta Crop Protection Limited
Address:	Tower II, Level 7, 110 Symonds Street Private Bag 92618, Symonds Street AUCKLAND NEW ZEALAND
Telephone number:	(weekdays) 09 306 1500
Emergency Telephone number:	(24 Hours) 0800 734 607
National Poisons & Hazchem Information Centre :	0800 POISON (0800 764 766)

Section 2: HAZARDS IDENTIFICATION

Hazard classification:	6.1D, 6.9A, 9.1A, 9.3C, 9.4A
Priority Identifier:	WARNING KEEP OUT OF REACH OF CHILDREN
Secondary Identifiers:	<p>6.1D = May be harmful if swallowed.</p> <p>6.9A = May cause peripheral and/or central nervous systems damage from repeated oral exposure at high doses.</p> <p>9.1A = Very toxic to aquatic organisms. Higher risk of toxic effects in estuarine environments.</p> <p>9.3C = Harmful to terrestrial vertebrates.</p> <p>9.4A = Very toxic to terrestrial invertebrates.</p>

Section 3: COMPOSITION / INFORMATION ON INGREDIENTS

Mixture:		
Chemical Identity of ingredients:		
Ingredient	CAS no.	Content (% w/w)
Emamectin Benzoate	155569-91-8	5%
Sodium 2-[methyloleoylamino]ethane-1-sulphonate	137-20-2	>=3 - <10
Naphthalenesulfonic acid, bis(1-methylethyl)-, sodium salt	1322-93-6	>=1 - <5
Other ingredients determined not to be hazardous	-	to 100%

Section 4: FIRST AID MEASURES

Description of First Aid measures:	
General Advice:	For advice contact the National Poisons Centre on 0800 POISON (0800 764 766) or a doctor immediately. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to mouth. Obtain medical attention.
If inhaled:	<p>Move the victim to fresh air.</p> <p>If breathing is irregular or stopped, administer artificial respiration.</p> <p>Keep patient warm and at rest.</p> <p>Call a Doctor or the Poisons Information Centre immediately.</p>

In case of skin contact:	Take off all contaminated clothing immediately. Wash off immediately with plenty of water. If skin irritation persists, call a doctor. Wash contaminated clothing before re-use.
In case of eye contact:	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses (if present). Immediate medical attention is required.
If swallowed:	If swallowed seek medical advice immediately and show the container or label. DO NOT induce vomiting.
Important symptoms and effects, both acute and delayed:	
Symptoms:	Lack of co-ordination. Tremors Dilation of the pupil
Indication of any immediate medical attention and special treatment needed:	
This material is believed to enhance GABA activity in animals. It is probably wise to avoid drugs that enhance GABA activity (barbiturates, benzodiazepines, valproic acid) in patients with potentially toxic emamectin benzoate exposure. Toxicity can be minimised by early administration of chemical absorbents (eg activated charcoal). If toxicity from exposure has progressed to cause severe vomiting, the extent of resultant fluid and electrolyte imbalance should be gauged. Appropriate supportive parenteral fluid replacement therapy should be given, along with other required supportive measures as indicated by clinical signs, symptoms and measurements.	

Section 5: FIRE-FIGHTING MEASURES

Extinguishing media:	
Suitable extinguishing media:	Small fires: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Large Fires: Alcohol resistant foam or water spray.
Unsuitable extinguishing media:	Do not use a solid water stream as it may scatter and spread fire.
Special hazards arising from the substance or mixture:	
Specific hazards during fire-fighting:	Fire will spread by burning with a visible flame. As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10) Exposure to decomposition products may be a hazard to health.
Advice for firefighters:	
Special protective equipment for firefighters:	Wear full protective clothing and self-contained breathing apparatus.
Hazchem Code:	2X
Further information:	Do not allow run-off from fire fighting to enter drains or water courses. Cool closed containers exposed to fire with water spray.

Section 6: ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Refer to protective measures listed in Sections 7 and 8.
Avoid dust formation.

Environmental Precautions:

Do not flush into surface water or sanitary sewer system.
If the product contaminates rivers and lakes or drains inform respective authorities.

Methods and material for containment and cleaning up:

Contain spillage, pick up with an electrically protected vacuum cleaner or by wet-brushing and transfer to a container for disposal according to local regulations (see section 13).
Do not create a powder cloud by using a brush or compressed air.
Clean contaminated surface thoroughly.
Clean with detergents. Avoid solvents.
Retain and dispose of contaminated wash water.

Reference to other sections:

Refer to disposal considerations listed in Section 13.
Refer to protective measures listed in sections 7 and 8.

Section 7: HANDLING AND STORAGE

Precautions for Safe handling:

Advice on safe handling:

This material is capable of forming flammable dust clouds in air, which, if ignited, can produce a dust cloud explosion.
Flames, hot surfaces, mechanical sparks and electrostatic discharges can serve as ignition sources for this material.
Electrical equipment should be compatible with the flammability characteristics of this material. The flammability characteristics will be made worse if the material contains traces of flammable solvents or is handled in the presence of flammable solvents.
This material can become readily charged in most operations.
Avoid contact with skin and eyes.
When using do not eat, drink or smoke.
For personal protection see section 8.

Dust explosion class:

May form flammable dust-air mixture.

Conditions for safe storage, including any incompatibilities:

Requirements for storage area and containers:

Keep containers tightly closed in a dry, cool and well-ventilated place.
Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs.

Specific end use(s)

Specific use(s)

For proper and safe use of this product, please refer to the approval conditions laid down on the product label.

Section 8: EXPOSURE CONTROL / PERSONAL PROTECTION

Control Parameters

Occupational Exposure Limits:

Components	CAS No	Value type (form of exposure)	Control parameters	Basis
Enamectin benzoate	155569-91-8	TWA	0.02 mg/m ³	Syngenta

Exposure controls	
Engineering measures:	<p>Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated.</p> <p>The extent of these protection measures depends on the actual risks in use.</p> <p>Maintain air concentrations below occupational exposure standards.</p> <p>Where necessary, seek additional occupational hygiene advice.</p>
Personal Protective Protection:	
Eye protection:	No special protective equipment required.
Hand protection:	
Material:	Nitrile rubber
Break through time:	>480 min
Glove thickness:	0.5 mm
Remarks:	<p>Wear protective gloves. The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other.</p> <p>Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves.</p> <p>Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.</p>
Skin and body protection:	<p>Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place.</p> <p>Remove and wash contaminated clothing before re-use.</p> <p>Wear as appropriate:</p> <p>Dust impervious protective suit.</p>
Respiratory protection:	<p>When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.</p> <p>Suitable respiratory equipment:</p> <p>Respirator with a half face mask</p> <p>The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used.</p>
Filter type:	Particulates type (P)
Protective measures:	<p>The use of technical measures should always have priority over the use of personal protective equipment.</p> <p>When selecting personal protective equipment, seek appropriate professional advice.</p> <p>Personal protective equipment should be certified to appropriate standards.</p>

Section 9: PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties:	
Appearance:	Granules
Colour:	White to tan
Odour:	Non specific
Odour threshold:	No data

pH value	4 - 8, concentration: 1% w/v
Melting point / freezing point:	No data
Initial boiling point and boiling range:	No data
Flash point:	No data
Flammability (solid, gas):	Not classified as a flammability hazard
Upper flammability / explosive limits:	No data
Lower flammability / explosive limits	No data
Burning number:	5 (20°C) 5 (100°C)
Vapour pressure:	No data
Vapour Density:	No data
Density:	No data
Bulk density:	0.4 - 0.65 g/cm ³
Solubility in other solvents:	Soluble in water
Partition co-efficient: n-octanol / water:	No data
Autoignition temperature	No data
Decomposition temperature:	No data
Dynamic viscosity:	Solid – not relevant
Explosive properties:	Not explosive
Oxidising properties:	Not oxidising
Surface tension:	33.3 mN/m at 20°C
Dust explosion class:	May form flammable dust-air mixture
Minimum ignition energy:	30 - 100 mJ

Section 10: STABILITY AND REACTIVITY

Reactivity:

See Section: "Possibility of Hazardous Reactions".

Chemical Stability:

The product is stable when used in normal conditions.

Possibility of Hazardous Reactions:

No hazardous reactions by normal handling and storage according to provisions.

Conditions to Avoid

No decomposition if used as directed.

Incompatible Materials:

No substances are known which lead to the formation of hazardous substances or thermal reactions.

Hazardous Decomposition Products:

Combustion or thermal decomposition will evolve toxic and irritant vapours.

Section 11: TOXICOLOGICAL INFORMATION

HSNO Classifications:

6.1D = May be harmful if swallowed, inhaled or absorbed through the skin.

6.9A = May cause peripheral and/or central nervous systems damage from repeated oral exposure at high doses.

Acute toxicity (product)

Swallowed:	LD ₅₀	1516 mg/kg (rat, male and female)
Dermal absorption:	LD ₅₀	>2000 mg/kg (rat, male and female)
Inhaled:	LC ₅₀ (4 h)	6.28 mg/L (rat, male and female))
Aspiration hazard:	Not classified	
Respiratory irritation:	Not classified	
Skin corrosion / irritation:	NON-IRRITANT (HSNO Classification) (rabbit)	

Eye damage / irritation:	NON-IRRITANT (HSNO Classification) (rabbit)
Respiratory or Skin Sensitisation:	NOT A SKIN SENSITISER (HSNO Classification) (guinea pigs)
Chronic / Long Term Effects (active ingredient)	
Germ cell mutagenicity:	Animal testing did not show any mutagenic effects.
Carcinogenicity:	No evidence of carcinogenicity in animal studies.
Reproductive toxicity:	No toxicity to reproduction.
Specific Organ toxicity:	<p><i>Single exposure:</i> Target Organs: Nervous system The substance or mixture is classified as specific target organ toxicant, single exposure Class 6.9A, (GHS: category 1). A single exposure may damage the central and peripheral nervous systems.</p> <p><i>Repeated exposure:</i> Target Organs: Nervous system The substance or mixture is classified as specific target organ toxicant, repeated exposure, Class 6.9A, (GHS: category 1). May cause peripheral and/or central nervous systems damage from repeated oral exposure at high doses.</p>
Narcotic Effects:	Not classified.

Section 12: ECOLOGICAL INFORMATION

HSNO Classifications:

- 9.1A = Very toxic to aquatic organisms.
9.3C = Harmful to terrestrial vertebrates.
9.4A = Very toxic to terrestrial invertebrates.

Ecotoxicity Effects - Aquatic

Acute toxicity to fish:	LC ₅₀ (96 h) = 6.8 mg/L (<i>Cyprinus carpio</i> [carp]) (product) LC ₅₀ (96 h) = 1430 µg/L (sheepshead minnow) (product)
Toxicity to daphnia and other aquatic invertebrates:	LC ₅₀ (48h) = 0.076 mg/L (<i>Daphnia magna</i> (water flea)) (product)
Toxicity to algae:	ErC ₅₀ (96 h) = 157 mg/L (<i>Pseudokirchneriella subcapitata</i> (Freshwater green algae)) (product)

Ecotoxicity Effects - Terrestrial

Toxicity to Birds:	LD ₅₀ = 46 mg/kg (mallard ducks) (active ingredient) LD ₅₀ = 264 mg/kg (bobwhite quail) (active ingredient)
Toxicity to soil dwelling organisms:	LC ₅₀ (14 days) = >1000 mg/kg (earthworms) (active ingredient)
Toxicity to Bees:	LD ₅₀ (contact) = 0.0036 µg/bee (active ingredient)

Persistence and degradability:

Biodegradability:	Not readily biodegradable.
Stability in water:	Degradation half-life: 0.4 – 1.74 d Not persistent in water.

Bioaccumulative potential:

Bioaccumulation:	Does not bioaccumulate.
-------------------------	-------------------------

Mobility in soil:

Distribution among environmental compartments:	Immobile in soils
Stability in soil:	DT ₅₀ : 0.335 – 2.56 d Percentage dissipation: 50% Not persistent in soil.

**Other adverse effects:
 Results of PBT and vPvB
 assessment (product):**

This substance is not considered to be persistent, bioaccumulating and toxic (PBT).. This substance is not considered to be very persistent and very bioaccumulating (vPvB).

Section 13: DISPOSAL CONSIDERATIONS

Product Disposal:

DO NOT contaminate ponds, waterways or ditches with chemical or used containers. DO NOT dispose of waste into sewer. Dispose of this product only by using according to the label. Otherwise, dispose of waste at an approved landfill or other approved facility that will ensure the substance does not exceed the tolerable exposure limit (TEL) or environmental exposure limit (EEL), where relevant, or will treat the substance so that it is rendered no longer hazardous.

Container Disposal:

Ensure the container is empty. Triple rinse empty container and add rinsate to the spray tank. Recycle empty container through Agrecovery (0800 247 326, www.agrecovery.co.nz). Otherwise crush and bury in a suitable landfill. DO NOT reuse this container for any other purpose.

Section 14: TRANSPORT INFORMATION

Rail / Road (NZS 5433)

UN-No: 3077
 Class: 9
 Packing Group: III
 Proper shipping name: ENVIRONMENTALLY HAZARDOUS
 SUBSTANCE, SOLID, N.O.S.
 (Emamectin benzoate)

Sea (IMDG-Code)

UN-No: 3077
 Class: 9
 Packing Group: III
 Proper shipping name: ENVIRONMENTALLY HAZARDOUS
 SUBSTANCE, SOLID, N.O.S.
 (Emamectin benzoate)
 EmS Code: F-A, S-F
 MARINE POLLUTANT: Yes

Air (IATA)

UN-No: 3077
 Class: 9
 Packing Group: III
 Proper shipping name: ENVIRONMENTALLY HAZARDOUS
 SUBSTANCE, SOLID, N.O.S.
 (Emamectin benzoate)
 Packing instruction: 956
 Packing instruction (LQ): Y956

Section 15: REGULATORY INFORMATION

HSNO Approval Number:	HSR000110
Tolerable Exposure Limit or Environmental Exposure Limit:	No TEL or EEL values are set for this substance at this time
Required Regulatory Controls:	
Certified handler:	No
Tracking:	No
Record Keeping:	Yes. 9.1A substance
ACVM Registration:	P007132
ACVM Controls:	See www.foodsafety.govt.nz/industry/acvm for registration conditions.
International Agreements related to the substance (eg, Montreal Protocol, Stockholm Convention or Rotterdam Convention):	Not applicable

Section 16: OTHER INFORMATION
