

1. IDENTIFICATION

Product Name	Disodium octaborate, tetrahydrate
Other Names	Actibor; Disodium octaborate [CAS#12008-41-2]; ETIDOT-67
Uses	Agriculture (micronutrient, insecticide); Wood protection (insecticide, fungicide); Flame retardant.
Chemical Family	No Data Available
Chemical Formula	Na ₂ B ₈ O ₁₃ .4H ₂ O
Chemical Name	Disodium octaborate, tetrahydrate
Product Description	No Data Available

Contact Details of the Supplier of this Safety Data Sheet

Organisation	Location	Telephone
Redox Pty Ltd	2 Swettenham Road Minto NSW 2566 Australia	+61-2-97333000
Redox Pty Ltd	11 Mayo Road Wiri Auckland 2104 New Zealand	+64-9-2506222
Redox Inc.	3960 Paramount Boulevard Suite 107 Lakewood CA 90712 USA	+1-424-675-3200
Redox Chemicals Sdn Bhd	Level 2, No. 8, Jalan Sapir 33/7 Seksyen 33, Shah Alam Premier Industrial Park 40400 Shah Alam Sengalor, Malaysia	+60-3-5614-2111

Emergency Contact Details

For emergencies only; DO NOT contact these companies for general product advice.

Organisation	Location	Telephone
Poisons Information Centre	Westmead NSW	1800-251525 131126

2. HAZARD IDENTIFICATION

Poisons Schedule (Aust) Not Scheduled

Globally Harmonised System

Hazard Classification Hazardous according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals (GHS)

Hazard Categories Acute Toxicity (Oral) - Category 5
Toxic To Reproduction - Category 2

Signal Word Warning

Hazard Statements

H303 May be harmful if swallowed.

H361d Suspected of damaging the unborn child.

Precautionary Statements

Prevention	P201	Obtain special instructions before use.
	P281	Use personal protective equipment as required.
Response	P308 + P313	IF exposed or concerned: Get medical advice/ attention.
	P312	Call a POISON CENTER or doctor/physician if you feel unwell.
Storage	P405	Store locked up.
Disposal	P501	Dispose of contents/container in accordance with local / regional / national / international regulations.

National Transport Commission (Australia)

Australian Code for the Transport of Dangerous Goods by Road & Rail (ADG Code)

Dangerous Goods Classification NOT Dangerous Goods according to the criteria of the Australian Code for the Transport of Dangerous Goods by Road & Rail (ADG Code)

Environmental Protection Authority (New Zealand)

Hazardous Substances and New Organisms Amendment Act 2015

HSNO Classifications

Health Hazards	6.1E	Substances that are acutely toxic –May be harmful, Aspiration hazard
	6.4A	Substances that are irritating to the eye
	6.8B	Substances that are suspected human reproductive or developmental toxicants
Environmental Hazards	9.1D	Substances that are slightly harmful to the aquatic environment or are otherwise designed for biocidal action

3. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients

Chemical Entity	Formula	CAS Number	Proportion
Disodium octaborate, tetrahydrate	Na ₂ B ₈ O ₁₃ .4H ₂ O	12280-03-4	<=100 %

4. FIRST AID MEASURES

Description of necessary measures according to routes of exposure

Swallowed IF SWALLOWED: Rinse mouth, then drink plenty of water. Do not induce vomiting unless directed to do so by

medical personnel. Call a Poison Centre or doctor/physician for advice if large amounts are swallowed (i.e. more than one teaspoon) or if you feel unwell.

Eye	IF IN EYES: Immediately flush eyes with running water for several minutes, holding eyelids open and occasionally lifting the upper and lower lids. Remove contact lenses if present and easy to do. Continue rinsing for at least 15 minutes. If eye irritation persists, get medical advice/attention.
Skin	IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. If skin irritation occurs, get medical advice/attention.
Inhaled	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If respiratory symptoms persist, get medical advice/attention.
Advice to Doctor	If exposed or concerned, get medical advice/attention. Observation only is required for adult ingestion of less than 4 grams of product. For ingestion in excess of 4 grams, maintain adequate kidney function and force fluids. Gastric lavage is recommended for symptomatic patients only. Hemodialysis should be reserved for massive acute ingestion or patients with renal failure. Boron analyses of urine or blood are only useful for documenting exposure and should not be used to evaluate severity of poisoning or to guide treatment.
Medical Conditions Aggravated by Exposure	No information available.

5. FIRE FIGHTING MEASURES

General Measures	If safe to do so, move undamaged containers from fire area. Cool containers with water spray until well after fire is out.
Flammability Conditions	Non-combustible material; The product itself is a flame retardant.
Extinguishing Media	If material is involved in a fire, use any fire extinguishing media suitable for nearby fire.
Fire and Explosion Hazard	Reaction with strong reducing agents such as metal hydrides or alkali metals will generate hydrogen gas, which could create an explosive hazard.
Hazardous Products of Combustion	Fire or heat may produce irritating, toxic and/or corrosive fumes.
Special Fire Fighting Instructions	Contain runoff from fire control or dilution water - Runoff may pollute waterways.
Personal Protective Equipment	Wear self-contained breathing apparatus (SCBA) and chemical splash suit. SCBA and structural firefighter's uniform may provide limited protection.
Flash Point	No Data Available
Lower Explosion Limit	No Data Available
Upper Explosion Limit	No Data Available
Auto Ignition Temperature	No Data Available
Hazchem Code	No Data Available

6. ACCIDENTAL RELEASE MEASURES

General Response Procedure	Ensure adequate ventilation. Do not touch or walk through spilled material. Avoid generating dust. Avoid breathing dust and contact with eyes, skin and clothing.
Clean Up Procedures	Collect material (vacuum or sweep up) and place into suitable containers for recovery or disposal (see SECTION 13).
Containment	Stop leak if safe to do so – Prevent entry into waterways, drains or confined areas. Prevent dust cloud.
Decontamination	No information available.
Environmental Precautionary Measures	Prevent entry into drains and waterways.
Evacuation Criteria	Spill or leak area should be isolated immediately. Keep unauthorised personnel away.
Personal Precautionary Measures	Use personal protective equipment as required (see SECTION 8).

7. HANDLING AND STORAGE

Handling	Safety showers and eyewash facilities should be provided within the immediate work area for emergency use. Ensure adequate ventilation. Obtain special instructions before use - Do not handle until all safety precautions have been read and understood. Minimise dust generation and accumulation. Avoid breathing dust and contact with eyes, skin and clothing. Do not ingest. Use personal protective equipment as required (see SECTION 8).
Storage	Store indoors, in a dry and well-ventilated place, out of direct sunlight. Keep container tightly closed and prevent any accidental damage. Protect from moisture, Keep away from incompatible materials (see SECTION 10). Store locked up. - To maintain package integrity and to minimise caking of the product, bags should be handled on a first-in first-out basis.
Container	Keep in the original container.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

General	No specific exposure standards are available for this product. For dusts from solid substances without specific occupational exposure standards: - Safe Work Australia Exposure Standard (Nuisance dusts): 8 hr TWA = 10 mg/m ³ (measured as inhalable dust). - New Zealand WES (Particulates not otherwise classified): TWA = 10 mg/m ³ ; TWA = 3 mg/m ³ (respirable dust).
Exposure Limits	No Data Available
Biological Limits	No information available.
Engineering Measures	A system of local and/or general exhaust is recommended to keep employee exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area.
Personal Protection Equipment	- Respiratory protection: In case of prolonged exposure to dust, wear dust mask/particulate filter respirator (refer to AS/NZS 1715 & 1716). - Eye/face protection: Wear appropriate eye protection to avoid eye contact. Goggles may be warranted if environment is excessively dusty. - Hand protection: Handle with gloves. - Skin/body protection: Wear appropriate personal protective clothing to avoid skin contact.
Special Hazards Precautions	No information available.
Work Hygienic Practices	Do not eat, drink or smoke when using this product. Wash hands before breaks and at the end of the workday. Take off contaminated clothing and wash before reuse.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State	Solid
Appearance	Powder
Odour	Odourless
Colour	White
pH	8.5 (1% solution)
Vapour Pressure	Negligible (@ 20 °C)
Relative Vapour Density	No Data Available
Boiling Point	No Data Available
Melting Point	815 °C
Freezing Point	No Data Available
Solubility	9.7% in water @ 20 °C - 27.4% in water @ 40 °C
Specific Gravity	No Data Available
Flash Point	No Data Available
Auto Ignition Temp	No Data Available
Evaporation Rate	No Data Available
Bulk Density	No Data Available
Corrosion Rate	No Data Available
Decomposition Temperature	No Data Available

Density	No Data Available
Specific Heat	No Data Available
Molecular Weight	412.5 g/mol
Net Propellant Weight	No Data Available
Octanol Water Coefficient	No Data Available
Particle Size	No Data Available
Partition Coefficient	No Data Available
Saturated Vapour Concentration	No Data Available
Vapour Temperature	No Data Available
Viscosity	No Data Available
Volatile Percent	No Data Available
VOC Volume	No Data Available
Additional Characteristics	No information available.
Potential for Dust Explosion	No information available.
Fast or Intensely Burning Characteristics	No information available.
Flame Propagation or Burning Rate of Solid Materials	No information available.
Non-Flammables That Could Contribute Unusual Hazards to a Fire	No information available.
Properties That May Initiate or Contribute to Fire Intensity	Non-combustible material; The product itself is a flame retardant.
Reactions That Release Gases or Vapours	Fire or heat may produce irritating, toxic and/or corrosive fumes.
Release of Invisible Flammable Vapours and Gases	Reaction with strong reducing agents such as metal hydrides or alkali metals will generate hydrogen gas, which could create an explosive hazard.

10. STABILITY AND REACTIVITY

General Information	No information available.
Chemical Stability	Stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.
Conditions to Avoid	Avoid generating dust. Avoid contact with incompatible materials.
Materials to Avoid	Incompatible/reactive with strong reducing agents, alkali metals.
Hazardous Decomposition Products	Fire or heat may produce irritating, toxic and/or corrosive fumes. Reaction with strong reducing agents such as metal hydrides or alkali metals will generate hydrogen gas which could create an explosive hazard.
Hazardous Polymerisation	No information available.

11. TOXICOLOGICAL INFORMATION

General Information	<ul style="list-style-type: none"> - Acute toxicity: May be harmful if swallowed. Not intended for ingestion. Small amounts (i.e. less than one teaspoon) swallowed accidentally are not likely to cause effects; swallowing larger amounts may cause gastrointestinal symptoms. Symptoms of overexposure have been associated with ingestion or absorption through large areas of damaged skin. These may include nausea, vomiting and diarrhoea, with delayed effects of skin redness and peeling. Dermal exposure is not usually a concern because it is poorly absorbed through intact skin. - Skin corrosion/irritation: Does not cause irritation to intact skin. - Eye damage/irritation: Non-irritating to eyes in normal industrial use. - Respiratory/skin sensitisation: Disodium octaborate, tetrahydrate is not a skin sensitiser. - Germ cell mutagenicity: Disodium octaborate, tetrahydrate is not mutagenic. - Carcinogenicity: Disodium octaborate, tetrahydrate is not carcinogenic. - Reproductive toxicity: Suspected of damaging the unborn child. - STOT (single exposure): Occasional mild irritation effects to nose and throat may occur from inhalation of high levels of dusts. - STOT (repeated exposure): No information available.
----------------------------	--

- Aspiration toxicity: Disodium octaborate, tetrahydrate has no aspiration hazard.

Acute	
Ingestion	Acute toxicity (Oral): - LD50, Rats: 2,550 mg/kg bw. (Disodium octaborate).
Other	Acute toxicity (Dermal): - LD50, Rabbits: >2,000 mg/kg bw.
Reproduction	Animal feeding studies at high doses have demonstrated effects on fertility and testes. Studies in rat, mouse and rabbit, at high doses, demonstrate developmental effects on the foetus, including foetal weight loss and minor skeletal variations. The doses administered were many times in excess of those which humans would normally be exposed to. While boron has been shown to adversely affect male reproduction in laboratory animals, there is no clear evidence of male reproductive effects attributable to boron in studies of highly exposed workers. An epidemiology study under the conditions of normal occupational exposure to borate dusts indicated no effect on fertility. Human epidemiological studies show no increase in pulmonary disease in occupational populations with chronic exposures to borate dusts. A study conducted in Turkey with boron exposed mine workers showed that mean blood concentrations of the high exposure group is ~6 times and ~9 times lower than those of the highest no effect level of boron in blood with regard to developmental and reprotoxic effects (respectively) in rats. With those findings, no unfavourable effects of boron exposure on reproductive indicators are observed in humans.
Carcinogen Category	None

12. ECOLOGICAL INFORMATION

Ecotoxicity	Aquatic toxicity: - LC50, Fish (<i>Pimephales promelas</i>): 79.7 mg B/L or 380 mg Disodium octaborate, tetrahydrate/L (96 h). - LC50, Crustacea (<i>Daphnia magna</i>): 133 mg B/L or 635 mg Disodium octaborate, tetrahydrate/L (48 h). - EC50, Algae (<i>Pseudokirchneriella subcapitata</i>), biomass: 40 mg B/L or 191 mg Disodium octaborate, tetrahydrate/L (72 h).
Persistence/Degradability	Boron is naturally occurring and ubiquitous in the environment. Disodium octaborate, tetrahydrate decomposes in the environment to natural borate.
Mobility	Disodium octaborate, tetrahydrate is soluble in water and is leachable through normal soil.
Environmental Fate	Boron is an essential micronutrient for healthy growth of plants; however, it can be harmful to boron sensitive plants in higher quantities. Care should be taken to minimise the amount of borate product released to the environment. Disodium octaborate, tetrahydrate should only be used as part of a balanced plant nutrition program preferably after soil and/or tissue analysis.
Bioaccumulation Potential	Not bioaccumulative.
Environmental Impact	No Data Available

13. DISPOSAL CONSIDERATIONS

General Information	Dispose of contents/container in accordance with local/regional/national regulations.
Special Precautions for Land Fill	Small quantities of product can usually be disposed of at landfill sites. Tonnage quantities are not recommended to be sent to landfills - such material should, if possible, be used for an appropriate application.
