**Recommendation for application:**

Thanks to its even granulation the fertilizer can be applied easily with spreaders or by hand. Application is possible during the whole vegetation period. Watering-in promotes the immediate effect.

**Description of fertilizer properties:**

Controlled release NPK complex fertilizer fully coated. For nurseries, ornamentals and planting whole fertilisation. Basacote Plus contains all nutrients required for healthy growth of plants. As a result, additional fertilizer applications are not necessary. Mixing into substrate is recommended directly before use (maximum storage time 10 days). The product lasts 6 months under temperate conditions and constant temperature of 21°C.
