

BIOTA IRON POWDER

ANALYSIS

	% w/w
Iron (Fe) complexed by carboxylic acid, water soluble	13 %

PROPERTIES

Water soluble Iron micronutrient powder

Colour: off-white

pH of 1% solution in water: 2.5 - 3.5

Precipitation pH: >10

APPLICATION

It is advised to always have an expert make a fertilisation plan and to start with a test application. The exact dosage depends on the soil conditions and the crop. No guarantees can be given in the event of incorrect use.

Always carry out a test mixing and test application when combining with other products!

Soil application rate: 1 – 2 kg/ha.

Irrigation: Between 5 and 15 gram per 1000 Ltr water for vegetables (10 / 30 μ mol)

Spray (leaf application) 200 gr per 1000 Ltr water per ha

To be used only where there is a recognised need. Do not exceed the application rate.

STORAGE

Store in original closed packaging.

Store in dry and dark environment.
