

A photograph of a vast vineyard with rows of grapevines stretching towards the horizon. In the background, there are rolling hills or mountains under a clear sky.

Designer Plus®

Superior sticker and super wetter.
Organosilicone and latex blend.

What is Designer Plus?

Designer plus® is a superior sticker/super wetter adjuvant that has a unique combination of silicon, latex and a new deposition agent, for improved crop protection product performance.

Designer Plus increases the chemical loading on the target crop by lowering the surface tension of the spray solution. This also reduces the 'bounce off' of spray droplets from the target, gives excellent spread and crop coverage, and holds the pesticide on the crop, minimising run off.

Designer Plus is compatible with most crop protection formulations and their approved tank-mix partners, and it is safe to crops.

Benefits of using Designer Plus

- Proven to enhance performance of key pesticides, PGRs, and foliar nutrition applications.
- Enables reduced spray volumes without compromising coverage and efficacy
- Improves coverage and distribution of spray droplets
- Achieve rain fastness within 30 minutes
- Useful in catchy weather conditions
- Reduce spray drift, by increasing droplet size

The logo for Designer Plus, featuring the word "DESIGNER" in a large, bold, black font with a blue swoosh underneath, and "PLUS" in a smaller, red font below it.

Ideal for use with:

- Cereals
- Canola
- Wine grapes
- Vegetables
- Potatoes
- Legumes
- Fruit trees

Directions for use

- Always read the label before use.
- Add Designer Plus as the last component to the spray tank. Do not use Designer Plus in case of selectivity problems can be expected due to enhanced uptake of actives.
- Apply in a tank-mix with fungicides, insecticides, PGRs and foliar nutrients.

Situation	Rate	Comments
Oilseed rape, potatoes, legumes, vegetables	400-500ml/ha	Dependent on spray water volume. Use with a minimum application of 200L spray water/ha
Cereals	250ml/ha	Dependent on spray volume
Grapes - Powdery Mildew	250ml/ha	Dependent on water volume/ha used
Grapes - Downy Mildew, Botrytis, and other diseases	500ml/ha	Dependent on water volume/ha used
Fruit Trees*	50ml/100L: maximum of 500ml/ha	Use a minimum of 400L/ha spray. *Kiwifruit - Contact your Agnova NZ area manager before use.
Ornamentals	25ml/100L spray volume	
Drift Reduction	25-50ml/100L spray volume
