

GS-4

GLASS CLEANER FOR GREENHOUSE INTERIOR AND EXTERIOR

GS-4 is a cleaning agent specially developed for glasshouses. Dirty glass not only causes loss of light. A layer of dirt also provides a hiding place and breeding ground for disease. Fungi, bacteria, and viruses survive more easily when the glass is dirty.

GS-4 works without the need for brushing. Simply spraying the surface with the right concentration and then rinsing with water effectively removes all contamination, such as dirt, dust, soot, and organic materials. GS-4 is also available in a double concentrated variant: GS-4 Xtra.

PROPERTIES

- ✓ Only suitable for glass greenhouses.
- ✓ Can be used on both the inside and outside of the greenhouse.
- ✓ Does not contain hydrogen fluoride gas.
- ✓ Perfectly clean glass.
- ✓ No chemical vapor effect.
- ✓ GS-4 is also available in a double concentrated variant: GS-4 Xtra.

HOW TO APPLY?

MACHINE
INTERIOR

MACHINE
EXTERIOR

MANUAL

GS-4 can be used on both the inside and the outside of a glass greenhouse. When using on the inside: only apply in an empty, crop-free greenhouse and when the outdoor temperature is above 5°C/41°F. Do not use in the vicinity of fluoride-sensitive crops. For use on tempered glass, test the product first on both the inside and the outside of the same sample pane. Assess the clarity of the glass after rinsing with water and drying.

Dilute GS-4 and GS-4 Xtra with clean water according to the level of contamination on the glass:

CONTAMINATION	DILUTION	GS-4 PER HECTARE		GS-4 PER ACRE	
		CANS	WATER	CANS	WATER
Light	1:19	5	1900L	2	201 US gal
Heavy	1:9	10	1800L	4	190 US gal

CONTAMINATION	DILUTION	GS-4 XTRA PER HECTARE		GS-4 XTRA PER ACRE	
		CANS	WATER	CANS	WATER
Light	1:39	2,5	1950L	1	206 US gal
Heavy	1:19	5	1900L	2	201 US gal

Each can of GS-4 and GS-4 Xtra contains 20L/5.3 US gal. of product.

AFTER MIXING

- ✓ Avoid eye and skin contact by wearing safety glasses and protective clothing.
- ✓ Apply the spray liquid uniformly to the glass using appropriate spray equipment.
- ✓ Allow it to react for a while, but do not let it dry on the glass (pay attention when the weather is warm) to prevent damaging the glass.
- ✓ Within 5 minutes of application, depending on drying speed, thoroughly rinse the glass with clean water. After use, flush the equipment with water.
- ✗ GS-4 and GS-4 Xtra are not suitable for plastic greenhouses

ReduSystems® is the global leading brand in developing coatings and cleaners for greenhouse cultivation. The products control the incidence of natural light and heat to optimise the climate for the crop in every season - from a cooler climate in summer and more light in winter, to diffuse light and changing the light spectrum.

ReduSystems is a brand of Lumiforte®
