

MicroMag - granular

A micro-nutrient cocktail providing essential trace elements to plants over a complete growing season. For long term supply of Mg, Ca, S and trace nutrients.

MicroMag is a micro-nutrient cocktail providing essential trace elements to plants over a complete growing season.

It provides a long term supply of Mg, Ca, S and trace elements (Fe, Mn, Zn, Cu, B & Mo).

Main benefits

- Granular formulation provides a continuous supply of trace elements throughout the growing season.
- Contains Mg, Ca & S for good nutrient balance when used in conjunction with NPK fertilisers.
- Provides all necessary trace elements required by plants, including 1.2% Iron.

Application rates

Nutrient analysis

Magnesium (Mg)	5%
Calcium (Ca)	7%
Sulphur (S)	5.5%
Iron (Fe)	1.2%
Manganese (Mn)	2%
Zinc (Zn)	1.5%
Copper (Cu)	1.5%
Boron (B)	0.5%
Molybdenum (Mo)	0.015%

	Rate
Potting mixes	
General	0.75 - 1.0 kg / m ³
Sensitive plants	0.5 kg / m ³
Low P plants	1.0 - 1.5 kg / m ³
Open Ground	50 - 100 kg / ha
Protected growing	0.5 - 1.0 kg / 100 m ²

Use powder formulation to provide immediate supply of nutrients for seed-raising mixes and crops in small containers.
