

The perfect potting mix partners

# *nutricote*® & Triabon®

## Triabon®

*"The fastest way to fertilise slowly."*

Triabon® contains a controlling slow-release fertilizer which makes it ideal for potted plants and potting media.

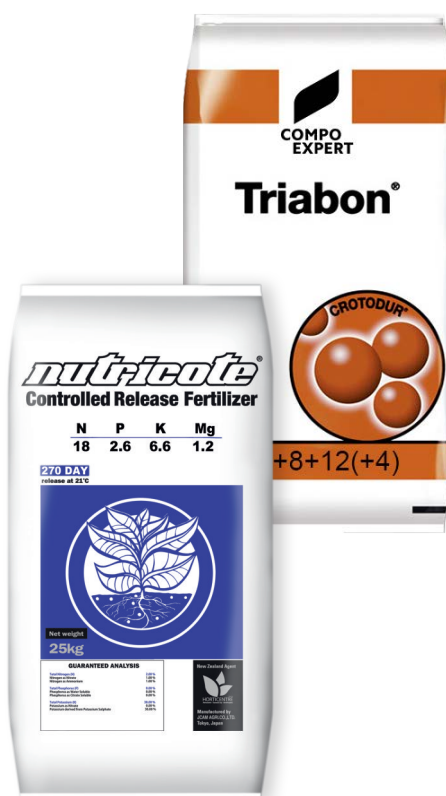

- Quick "green up"
- 3-4 month feeding
- Versatile
- Works even in cool conditions.

## *nutricote*®

*"A controlled release fertiliser that really lasts as long as it claims."*

Unlike many fertilisers, Nutricote® lasts throughout the growing season and is predictable.

- Unique coating
- Releases nutrients gradually with plant growth
- Available in a variety of formulations and applications.

**Talk to your local Horticulture or HortFertplus representative for more information on Nutricote® and Triabon®.**
