

Plantacote® plus Tablet

NEW!

Coated controlled release fertilizer tablet with a release time of approx. 6 months

Contents

NPK fertilizer containing magnesium, 14-9-15-(2) and micronutrients

14 % N	Total nitrogen
	6.3% N nitric nitrogen
	7.7% N ammoniacal nitrogen
3.9 % P	Phosphorus
12.4 % K	Potassium
1.2 % Mg	Magnesium
0.02 % B	Boron
0.02 % Cu	Copper
0.4 % Fe	Iron, 0.2% chelated by EDTA
0.1 % Mn	Manganese
0.02 % Mo	Molybdenum
0.02 % Zn	Zinc

Low in chlorine

Physical and chemical properties

Product form:	cone
Colour:	beige
Weight:	7.5 g

Description

Plantacote Plus Tablet is a controlled release fertilizer tablet for topdressing of container grown hardy nursery stock, pot plants, hanging baskets, balcony boxes and for fertilization in areas where application of fertilizers is difficult, e. g. landscaping.

In addition to nitrogen, phosphorus and potassium **Plantacote Plus Tablet** contains magnesium and trace elements. This ensures an even supply with major nutrients and trace elements over a period of approx. 6 months.

The high iron content of **Plantacote Plus Tablet** is crucial for good performance. Iron is essential for the formation of chlorophyll and is therefore vital for good foliage colour and healthy growth. To ensure high availability, 50 % of the iron in **Plantacote Plus Tablet** is chelated as Fe-EDTA.

The nutrients of **Plantacote Plus Tablet** are released by a natural membrane process which is controlled by soil temperature. Declared release times refer to an average soil temperature of 21°C. Higher temperatures accelerate the nutrient release, lower temperatures slow it down. The release time is unaffected by substrate type, pH, micro-organisms, or level of irrigation.

Key benefits

- quick and easy to use
- exact and safe dosage
- no trace element supplements are necessary
- no need for a dosage system
- complete package of major nutrients and trace elements
- controlled release effect
- only one application necessary - labour saving

Packaging: Bucket of 1000 tablets (7,5 kg)

Coated controlled release fertilizer

Recommendations for use

Plantacote Plus Tablet can easily be pressed into the growing media due to its conic form.

If applying several tablets per pot, these should be distributed evenly around the stem.

In case of drip irrigation the tablet should be placed below the dripper.

Crops	Number of tablets Pot volume		
	2 l	3 l	5 l
• container grown nursery stock	1	2	3 - 4
• pot plants	1	1 - 2	2 - 3
• hanging baskets	--	--	4 - 6
• shrubs and woody plants in landscaping	1 tablet per 30 cm plant height or 1 cm stem diameter		

Precautions

Store in a cool and dry place. The recommendations given here are of a general nature only. Carefully consult the special instructions for use before applying the product.
